

BSHES

BEHAVIORAL, SOCIAL, AND HEALTH EDUCATION SCIENCES

The Department of Behavioral, Social and Health Education Sciences (BSHES) strives to improve the health of all people and promote health equity through research and practice on the behaviors and social conditions that influence health. Students explore the impacts of human behavior and the socio-cultural contexts on population and community health and wellbeing. The BSHES program seeks diverse graduate students who have a strong desire to positively influence public health through effective design and implementation of health promotion programs, meaningful community engagement, and innovative research.

We continue to support an educational culture where everyone's authentic identities and perspectives are not just welcomed, but seen as true assets. Our personal identities and perspectives are often our most valuable skill sets, as they guide our methods for achieving the types of public health solutions we want to see in our own lives. We embrace collectively what we each bring as tools to use and learn from one another on our journey to public health solutions.

Don Operario, PhD, Professor and Chair

**Apply by the January 5 priority deadline
for MPH scholarship consideration**

BSHES DEGREES

- *MPH in Behavioral, Social, and Health Education Sciences*
- *PhD in Behavioral, Social, and Health Education Sciences*
