

# BIOS

## — BIOSTATISTICS AND BIOINFORMATICS —

The mission of Rollins' BIOS department is to develop, apply, and provide training in quantitative methods that can improve human health by teasing out the information contained within modern data.

We advance the science and practice of biostatistics through research, teaching, and collaboration.

---

*The field changes at such a rapid pace, we have to continually focus on strengthening our faculty expertise in big biomedical data and updating our curriculum for master's and PhD students so that when they graduate, they will have the exact state-of-the-art skills that they need.*

**Robert Krafty, PhD, Chair**

---

**Apply by the January 5 priority deadline  
for MPH/MSPH scholarship consideration**

## **BIOS DEGREES**

- *BA or BS/MSPH in Biostatistics*
- *MSPH in Biostatistics*
- *MPH in Biostatistics*
- *MSPH in Biostatistics*
- *PhD in Biostatistics*
