

## RSPH NEWS!!!

**Quantitative Essentials for Public Health**

**What is this?** A new Canvas site to help students brush up on foundational quantitative skills required to be successful in epidemiology and biostatistics courses. The site will contain three modules: Module 1 - fractions, decimals, and percentages; Module 2 - algebra; Module 3 - essential function and notation.

**How can it help students?** Students complete knowledge assessments; for items answered incorrectly, they access tutorials and practice problems to solidify challenging concepts; at their own pace, they take final assessments to evaluate acquisition of concepts and skills.

**Is completion of modules required?** No, this is optional. However, please promote this resource with 1st year students to set them up for success. All 1st year students have been added to the Canvas site.

**When will the site go live?** Module 1 is already live; the other two modules will be released later this summer.

**Can faculty be added for the Canvas site?** Yes, EPI and BIOS faculty have already been added. Other, please email [rsphenrollmentservices@emory.edu](mailto:rsphenrollmentservices@emory.edu).

Many thanks to Dr. Lauren Christiansen-Lindquist (EPI), Nikki Mastrud (GLEPI student), and Dr. Alex Edwards (BIOS) for developing this excellent resource!

## SPECIAL REQUEST

Interested in being a faculty representative for Honor and Conduct Code? Learn more by contacting [rsphenrollmentservices@emory.edu](mailto:rsphenrollmentservices@emory.edu).

## SEMESTER AT A GLANCE

Summer 2023

JUNE: Summer grading basis change deadline  
AUG: Summer Classes End

## RESOURCES FOR FALL

- [Fall 2023 Dates](#)
- [Canvas Course Templates](#)
- [RSPH Syllabus Template](#)

## RSPH SHOUT OUTS

Shout out to ADAPs and Student Affairs Staff who have juggled graduating students, returning students, and making sure incoming students are welcomed—**let them know you see them!**
