GRADUATE EMPLOYMENT SURVEY

Each year, the Office of Career Development collects information on employment outcomes through a post-graduation surveys. Results may be useful to faculty in several ways including:

(1) curriculum development adjustments, (2) evaluation of the effectiveness of assignments and course content, (3) faculty advising on career paths and job market trends, (4) alumni engagement for fostering connections, and (5) grant applications and funding opportunities requesting data on graduate success and impact of the school’s programs.
